01 About Me

I'm dedicated and detail-oriented student currently completing Bachelors in Information science and technology. I believe in team work and never hesitate to share my view. My aim is to create websites with great user experience and responsiveness.

02 Experience

- Participated in inter-college coding hakathons, like the Smart India Hakathon .

- Have experience in creating websites in wordpress.

- Designed certificates for a Inter-College Lecturers technical talk, coding workshop and Alumi felicitation program.

- Versatile in using UI design tools like figma.

- Have taken seminar on "Importance of UI design and its roadmap" to a crowd of 150 students.

- Have basic Github skills.

03 Certifications

- The Fundamentals Of Digital Marketing by Google.

- Learning How To Learn: Powerful mental tools to master tough subjects by Coursera.

- Have been part of seminars on networking using LinkedIn ,emerging trends in W3.

- Attended workshops on Creating animations using Blender software, Emerging trends in AI/ML, and Datastructures for real life problem solving.
